SERVICE, REPAIR AND RENTAL

At Certex Poland, we offer comprehensive support in the service, repair, and rental of lifting and hoisting equipment, tailored to your needs.

Our services:

Inspections and maintenance – Regular inspections of lifting equipment and fall protection systems in accordance with applicable standards.

Load testing – We perform tests on strength testing machines up to 100 tons, including NDT (non-destructive testing), as well as VT and MT inspections.

CertMax+ – An online system that provides access to the service history and documentation of your equipment.

Equipment rental – If you need equipment for a specific period, rental is the ideal solution.

Lifting training – We offer both basic and advanced training.

We are a certified company, confirmed by our **ISO 9001:2015** certification. This proves that we have implemented and maintain an effective Quality Management System in line with international standards.

Your Lifting Partner

With Certex Poland, you can be confident that your equipment is in good hands. As part of the global **Lifting Solutions Group**, we specialize in lifting equipment, steel wire ropes, and services. We support customers in ports, energy, industry, and construction by delivering reliable products and solutions.

Trust a market leader and enhance safety and efficiency in your company!

Largest offshore wind farm in the UK

Siemens Gamesa commissioned the world's largest offshore wind farm in the United Kingdom. Certex UK, an expert in wind farm services, provided inspections and services that enabled the timely commissioning of Hornsea 2 in 2022.

Scope of services included:

- Regulatory inspections (LOLER, PUWER, PSSR)
- Service, repairs, and commissioning of cranes/jib cranes
- Inspections of fall protection equipment and PPE
- BAFE fire extinguisher inspections
- Training and technical support

Renovation of weirs on the Lower Rhine

The company is involved in the renovation of weirs on the Lower Rhine and the Lek River, including the Driel weir, which is crucial for water level regulation. After 50 years of operation, the gates required modernization.

Our activities:

- Replacement of 1,500 kg steel wire ropes (SWR)
- Quality testing in accordance with EN 3560
- Support in maintaining functionality and safety of the infrastructure

The renovation supports sustainable water management and ensures the reliability of the weirs for decades to come.

Steel wire ropes for the Samuel Beckett Bridge

The Samuel Beckett Bridge in Dublin, with its distinctive pylon and 31 cables resembling an Irish harp, requires regular inspections to ensure safety and durability.

The company carried out NDT/MRT inspections of the cables using SuproTech technology and a cable crawler, precisely assessing the condition of the steel wire ropes. The results showed minimal deviations, allowing the bridge to remain in operation.

Our offer:

- Steel wire ropes (SWR) for demanding applications
- MRT cable testing for the highest level of control and safety.

CERTEX

Szczecin branch

Our Szczecin branch includes a sales office along with a warehouse for synthetic slings, chain slings, and components.

ul. Lubczyńska 6c
70-895 Szczecin
