

# DAILY INSPECTION OF A LASHING

What should be checked before each use?

## ✓ Check the webbing:

- ✓ no cuts or abrasions,
- ✓ no twists,
- ✓ label intact and readable,
- ✓ no knots,
- ✓ no melted fibers.

## ✓ Check the tensioner:

- ✓ no cracks or deformation,
- ✓ release latch working properly,
- ✓ no corrosion,
- ✓ no excessive play on the axle,
- ✓ no blockages or sticking of the mechanism.

## ✓ Check hooks and end fitting

- ✓ no deformation,
- ✓ no cracks or corrosion,
- ✓ no play at the connection point,
- ✓ correct attachment of the hook to the webbing,
- ✓ compatibility of the hook with the vehicle's anchoring point.
