

LASHING SYSTEM DISPOSAL CRITERIA

Damaged tensioner

Any cracks in metal components, frame, or axle.

Damaged end fitting / hook

Cracked, bent, deformed, or excessively corroded end fittings.

Frayed edges

Visible fiber fraying, delamination, or "fluffing" of the webbing.

Deformed tensioner

Bent components, excessive play, or a sticking mechanism.

Cut / torn webbing

Cuts, tears, or fiber loss that are deep, long, or affect multiple load-bearing threads.

Missing or illegible label

Torn or unreadable label = no identification (LC, length, standard).
