

forankra

We have been MANUFACTURING our lashing straps for 36 years!

We use only components from trusted suppliers, which—combined with our experience—guarantees the highest quality and fast, on-time deliveries regardless of order size.

We approach every customer individually, enabling us to meet even the most unusual requirements. Being a MANUFACTURER gives us and our customers the following opportunities:

- creation of a dedicated label with the customer's name and/or logo,
- stitching the label onto the strap upon request,
- color selection (from available options),
- custom printing (e.g. company name) on the webbing,
- any configuration (length, width, hook type, tensioner type),
- full compliance with EN 12195-2 standard,
- ISO 9001:2015 quality certification.

Why FORANKRA?

We also offer professional consultancy and training in load securing for transport.

We look forward to working with you!

Forankra Pol is part of the Forankra Group, a leading European supplier of load securing and lifting solutions. We serve customers in road, air, and sea transport, as well as in industry and OEM manufacturing. The Group employs 230 people across 11 companies, operating mainly in Scandinavia, Poland, France, Spain, and the United Kingdom. We also collaborate with **Axel Johnson International** companies such as Widni (Finland and Estonia) and Allsafe (Germany, the Netherlands, Italy, Turkey, and Australia).

Forankra offers a wide range of products – from lashing systems and accessories to advanced technical load **securing systems** for all types of transport. Our production department enables us to deliver flexible, customized solutions tailored to our customers' needs, supporting the efficiency of their logistics and transport systems. Our products help customers effectively secure and optimize loads, contributing to increased competitiveness and improved financial performance. With many years of experience and a strong presence in international markets, we guarantee reliable solutions for every mode of transport.
