

Heavy Duty PowerMate Powered Stairclimber M2B

This is a highly ergonomic heavy Powered Stairclimber for fast and frequent handling with optimum safety. With a capacity of 680kg this model is of steel frame construction featuring a fold-down dolly for low effort general handling and hook box facility for safer floor to dock/deck loading.

The M2B has 200mm of extra height to accommodate taller loads. The PowerMate M2B Stairclimber is also built with hand operated wheel brakes which stop the machine rolling forward, unless the break is released by the operator.

Model M2B comes complete with: two strapbars, one 12V sealed long life battery, a battery cover, and a two wheel retractable dolly, one battery charger with auto shut off and multi voltage feature, and one hook bar lever.

Suitable for a variety of applications including:

Commercial catering equipment, couriers/delivery services, fire cabinets, lifts & elevators, mainframe computers, motors, pool tables, pumps, rail industry, security & safes, shops/retail, switchgear frames, vending & licenced trade, white goods

Functions: Stairclimber, vehicle loader, general handler
